

BATHROOM & LIMESCALE

Remove limescale from tiles and taps

Shiny taps and clean tiles – quick and easy.

What you need

- **VARIOL S – Acidic descaler**

Dosage: Manual maintenance cleaning: 100 ml per 8 l of water · Descaling machines: 250 ml per 1 l of water · Deep cleaning of limescale deposits: 1:1 to 1:10 · Foam gun: 1:5 to 1:10

- **BIO Citrus-Activ – Descaler for appliances**

Dosage: Electrical appliances: approx. 50 ml per ½ l of water · Washing machines: approx. 500 ml in the empty machine (main wash 60 °C) · Pots, kettles etc.: 50–150 ml per ½ l of water · Tiles and fittings: undiluted

- **TORMA BAC – Microbiological odour remover**

Dosage: 200 ml per 10 litres of water From minimum dosage until undiluted (according to the degree of soiling)

- **EX +plus – Sanitary deep cleaner**

Dosage: 50–100 ml per 8 litres of water – from the minimum dosage up to undiluted (depending on the degree of soiling)

How to do it

- 1 Rinse the surface with water.
- 2 Apply descaler. Dose according to the product data sheet.
- 3 Let the product work briefly. Contact time: see the data sheet.
- 4 Rub with a soft sponge.
- 5 Rinse thoroughly and dry with a cloth.

Safety

- Read the label and data sheet before use.
- Wear gloves.
- Never mix different cleaning products.
- Acidic products can damage marble and natural stone.

Common mistakes

- Letting the product dry on.
- Scrubbing with steel wool – it scratches.

Questions and answers

How do I avoid new limescale?

Dry tiles and taps after use. It helps a lot.

Always follow the product label and data sheet. Data sheets are available at glenex.dk.
