

BATHROOM & LIMESCALE

Remove bad odours in the bathroom

Find the source and remove the odour – instead of hiding it.

What you need

- **TORMA BAC – Microbiological odour remover**
Dosage: 200 ml per 10 litres of water From minimum dosage until undiluted (according to the degree of soiling)
- **EX +plus – Sanitary deep cleaner**
Dosage: 50–100 ml per 8 litres of water – from the minimum dosage up to undiluted (depending on the degree of soiling)
- **TORMA plus – Odour absorber**
Dosage: Spray undiluted into the room or onto the source of the odour
- **KARIBIK – Fragrance oil**
Dosage: Undiluted

How to do it

- 1 Find the source: drain, toilet or grout.
- 2 Clean the source thoroughly. Dose according to the product data sheet.
- 3 Pour water into drains that are rarely used.
- 4 Ventilate well. Use a fragrance product at the end if you like.

Safety

- Read the label and data sheet before use.
- Wear gloves.
- Never mix different cleaning products.

Common mistakes

- Masking the odour with fragrance without cleaning.

Questions and answers

Why does the drain smell?

Often the trap is dry or dirty. Clean it and top up with water.

Always follow the product label and data sheet. Data sheets are available at glenex.dk.
