Deep cleaning of floors

Remove old care layers and stubborn dirt.

What you need

- **INTENSIV – Deep and all-purpose cleaner**

Dosage: Deep cleaning: 1:3 to 1:10 with water · All-purpose cleaning: 50–100 ml per 8 litres of water. Follow the floor covering manufacturer's technical instructions!

- **D1 NEU – All-round deep cleaner**

Dosage: Dilute 1:3 to 1:10 with water depending on the degree of soiling. Follow the floor covering manufacturer's technical instructions!

How to do it

- 1 Clear the floor and sweep thoroughly.
- 2 Mix the deep cleaner with water. Dose according to the product data sheet.
- 3 Spread the liquid and let it work. Contact time: see the data sheet.
- 4 Scrub with a machine or a scrubbing brush.
- 5 Vacuum up the dirty water and rinse with clean water.

Safety

- Read the label and data sheet before use.
- Wear gloves.
- Wear eye protection with strong products. See the data sheet.
- Slippery floor – put up signs.

Common mistakes

- Letting the liquid dry in.
- Forgetting to rinse afterwards.

Questions and answers

Can all floors take deep cleaning?

No. Check the data sheet – e.g. linoleum does not tolerate all products.

Always follow the product label and data sheet. Data sheets are available at glenex.dk.
