

DISINFECTION & HYGIENE

Correct hand disinfection

How to disinfect your hands correctly.

What you need

- **HEXAWOL Ethanol – Hand disinfectant, alcohol-based**
See the product data sheet for dosage (glenex.dk)
- **HEXAWOL – Surface disinfection**
See the product data sheet for dosage (glenex.dk)
- **HAIR & BODY – Shampoo for hair and body**
Dosage: Spread 0.5–1.5 ml over hair and body; then rinse the lather off thoroughly with water
- **ABRASIVA – Hand wash paste with scrubbing agent**
Dosage: Spread on wet hands and rinse off thoroughly with water.

How to do it

- 1 Hands must be dry and visibly clean.
- 2 Take enough product to cover both hands. Amount: see the data sheet.
- 3 Rub palms, backs of hands and between the fingers.
- 4 Remember thumbs and fingertips.
- 5 Rub until the hands are dry.

Safety

- Read the label and data sheet before use.
- Flammable – keep away from open flames. See the data sheet.

Common mistakes

- Forgetting the thumbs.
- Drying your hands on a towel afterwards.

Questions and answers

Does it replace hand washing?

No. If your hands are dirty, wash them first.

Always follow the product label and data sheet. Data sheets are available at glenex.dk.
