

**FLOORS & WOOD**

# Caring for natural stone and tiles

How to keep stone and tiles clean – without damaging them.

## What you need

- **DURO STONE – Scented cleaner for natural and artificial stone**

Dosage: Manual cleaning: 20–40 ml per 8 litres of water · Machine cleaning: 10–20 ml per 10 litres of water

- **Stenpleje – Self-shine dispersion for stone**

Dosage: Depending on the material and age of the floor covering, 1.5–2 l per 100 m<sup>2</sup> (per application). Can also be used at 1–5 % concentration as a wash-and-shine cleaner. Apply undiluted to the dry floor after deep cleaning. Follow the floor covering manufacturer's technical instructions on factory-finished surfaces!

- **D3 SPEZIAL – Wax- and polymer-based wash-care**

Dosage: Manual cleaning: 25–50 ml per 8 litres of water · Machine cleaning: 50 ml per 10 litres of water

## How to do it

- 1 Sweep away sand and grit – it scratches.
- 2 Choose a product that suits your stone. Check the data sheet.
- 3 Mix with water. Dose according to the product data sheet.
- 4 Wash and rinse with clean water.
- 5 Dry afterwards to avoid limescale spots.

## Safety

- Read the label and data sheet before use.
- Test a small, hidden spot first.
- Acidic products can damage marble and limestone.

## Common mistakes

- Using descaler on marble.
- Leaving sand on the floor.

## Questions and answers

### Are all stones the same?

No. Marble and limestone are sensitive. Granite tolerates more. Always check the data sheet.

Always follow the product label and data sheet. Data sheets are available at [glenex.dk](https://glenex.dk).
