

FLOORS & WOOD

How to clean wooden floors

A clean wooden floor in 4 steps – without damaging the wood.

What you need

- **DURO PARKETT – Scented cleaner for parquet and laminate**
Dosage: Manual cleaning: 20–40 ml per 8 litres of water · Machine cleaning: 10–20 ml per 10 litres of water
- **Ædelhårdvoks – Hard wax for wood and parquet**
Dosage: Depending on the material and age of the floor covering, 1–2 l per 100 m² (per coat). Apply undiluted with a sprayer after cleaning.
- **D3 SPEZIAL – Wax- and polymer-based wash-care**
Dosage: Manual cleaning: 25–50 ml per 8 litres of water · Machine cleaning: 50 ml per 10 litres of water
- **DURO STONE – Scented cleaner for natural and artificial stone**
Dosage: Manual cleaning: 20–40 ml per 8 litres of water · Machine cleaning: 10–20 ml per 10 litres of water

How to do it

- 1 Sweep or vacuum the floor first.
- 2 Fill a bucket with lukewarm water. Add the product. Dose according to the product data sheet.
- 3 Wring the mop out well. It should only be damp.
- 4 Wash in the direction of the wood grain.
- 5 Let the floor dry. Do not walk on it while it is wet.

Safety

- Read the label and data sheet before use.
- Test a small, hidden spot first.

Common mistakes

- Too much water – wood cannot stand being left wet.
- The wrong product for the surface. Check whether the floor is lacquered, oiled or soap-treated.

Questions and answers

How often should I wash the floor?

As needed. Sweep often – then you need to wash less often.

Can I use ordinary washing-up liquid?

Use a product designed for wooden floors instead.

Always follow the product label and data sheet. Data sheets are available at glenex.dk.
