

KITCHEN & GREASE

How to clean the oven easily

With INTENSIV, oven cleaning is easy. The secret: let the product work – let it soak!

What you need

- **INTENSIV – Deep and all-purpose cleaner**

Dosage: Deep cleaning: 1:3 to 1:10 with water · All-purpose cleaning: 50–100 ml per 8 litres of water. Follow the floor covering manufacturer's technical instructions!

- **VARIOL – Grill cleaner**

See the product data sheet for dosage

- **VARIOL A – Alkaline grease and oil remover**

Dosage: 50–100 ml per 8 litres of water – from the minimum dosage up to undiluted (depending on the degree of soiling)

- **SPÜLIX – Hand dishwashing liquid**

Dosage: 25–50 ml per 8 litres of water (depending on the degree of soiling)

How to do it

- 1 Switch off the oven and let it cool completely.
- 2 Take out the racks and trays.
- 3 Apply INTENSIV to the soiled area. Dose according to the product data sheet.
- 4 Soak: let the product work undisturbed. This is the most important step! Contact time: see the data sheet.
- 5 Wipe off the dirt with a damp cloth or sponge.
- 6 Rinse with clean water until all residue is gone.

Safety

- INTENSIV is corrosive (data sheet: H314). Wear gloves and eye protection.
- Do not breathe spray or vapour (data sheet: P260). Ventilate well.
- May be corrosive to metals (data sheet: H290). Rinse well afterwards.
- Read the label and data sheet before use.

Common mistakes

- Wiping off too early – give the product time!
- Cleaning a hot oven.
- Forgetting to rinse afterwards.

Questions and answers

What is the most important trick?

Patience. Let the product sit and work before you wipe. Then the dirt comes loose almost by itself.

How long should it work?

See the product data sheet.

Always follow the product label and data sheet. Data sheets are available at glenex.dk.
